Planning session 2

Phase 1:

Software Lexical

Software Concept

Android OS/Spec

Java (Level 2)

Mon Activity

Doc & Lien

Phase 2:

L'interface Utilisateur Les Intentions Les Interfaces Avancées Les Intentions Avancées

Phase 3:

La Persistance L'accès au réseau Question ?

L'interface Utilisateur (composants)

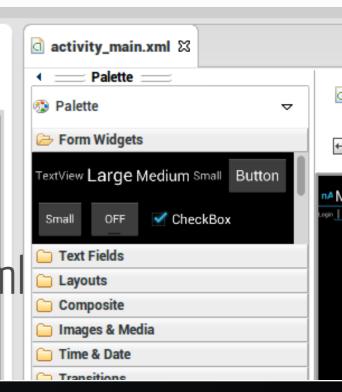

Rappel:

- Vue : /res/layout/xxxxxx.xml (Fragment & Activity => Layout & View)
- Activity: /src/tld/domain/package/ClassActivity.java

Composants ==> Palette! (dépendant de la version)

TextView, EditView, Button, ImageView...

http://developer.android.com/guide/topics/ui/index.htm

L'interface Utilisateur (ressources)

Les ressources :

http://developer.android.com/guide/topics/resources/index.html

Binding des ressources:

- String => Context.this.getString(R.string.app_name);
- Layout => Activity.this.setContentView(R.layout.activity_main);
- View/Layout => Activity.this.findViewById(R.id.activity_login_label);

L'interface Utilisateur (support V4)

```
Fragment & support V4: import android.support.v4.**
public class XxxxxActivity extends FragmentActivity {
public (static) class XxxxxFragment extends Fragment {
        @Override
        public View on Create View (Layout Inflater inflater, View Group container, Bundle bundle) {
                inflater.getContext().getSystemService(Context.LAYOUT_INFLATER_SERVICE);
                View view = inflater.inflate(R.layout.fragment, container);
                return view; }
}}
<fragment android:name="tld.domain.package.XxxxxActivity$XxxxxFragment"</pre>
android:id="@+id/fragment" android:layout_width="match_parent" android:layout_height="match_parent"/>
```

http://developer.android.com/tools/extras/support-library.html

Les Intentions

Intent Explicite (et Bundle):

- new Intent(Context, XxxxActivity.class);
- new Bundle().putSerializable("id", Serializable);
- intent.putExtras(b);
- Context.this.startActivity(Intent)
- Context.this.startService(Intent)

Quand? => Appel direct in-app!

Les Interfaces Avancées

Composants SDK:

- ListView http://developer.android.com/guide/topics/ui/layout/listview.html
- TabHost http://developer.android.com/guide/topics/ui/layout/tabs.html
- Menu/Contextual http://developer.android.com/guide/topics/ui/menus.html
- Dialog/Alert http://developer.android.com/guide/topics/ui/dialogs.html
- Toast http://developer.android.com/guide/topics/ui/notifiers/toasts.html
- Animation http://developer.android.com/guide/topics/graphics/index.html

Composants externe:

- ActionBarSherlock

- HoloEverywhere

Les Intentions Avancées

Intent vs Activity arbitre Filter? Par...

- Type d'objet
- Type mimes
- URI

- ...
